## THE HEADLINER

### Second Lockdown Had Successes, Failures

**What to know:** On Monday, January 29, MSMHS entered an unplanned, full-school lockdown, the second this month. According to MSMHS principal Ms. Amatrudo, the lockdown was triggered by a “vague report” that was deemed untrue after being “investigated fully” through police interviews and review of video footage.

**What went well:** Principal Ms. Amatrudo emphasized the successful aspects of the lockdown, explaining that

“officers were very happy with how all the rooms were locked down” and that she felt that it was a “successful completion of our emergency procedures.”

**What didn't go well:** Ms. Amatrudo said that there was an incident of student behavior in one location that was “absolutely abhorrent,” adding that it “could have jeopardized the safety of other people in that space.”

## FEBRUARY 2024 ISSUE Nº 9

*Produced by Kaiden Chandler, with work from Gracie Peil, Nathaniel Oulton, and Kaiden Chandler.*

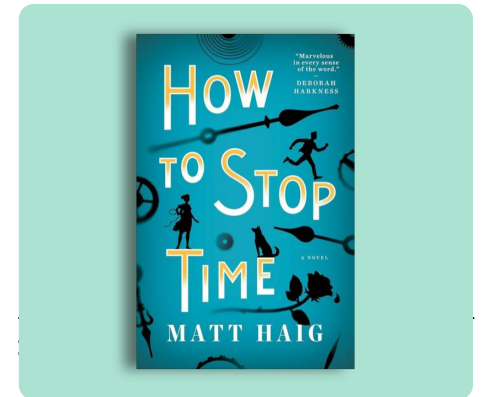

## BEHIND THE SCENES

### How *The Current* Reports

*Current* reporters follow the same guidelines used by professional news publishers like *The New York Times*. Every story we publish is rigorously fact-checked, and based on extensive research and in-person interviews.

## FROM THE BOOK REPORT

### Ada Gauthier's Book Pick

“I read another one of the author's works during the pandemic and I fell in love with the writing style. The book touches on how you would live your life if you were going to live forever; this made me a more conscious person in everyday life.”

INTERESTED IN WRITING, REPORTING, OR DESIGN?

## SNAPSHOT

Students in Aquaculture III are working on assembling a growing wall, a vertical greenery area with pockets for substrate and plants.

Water follows a pipe up the side of the growing wall to a spray bar, which distributes water down to the plants. Unused water flows down through the koi tank and recycles through the system.
